I support the choice of the solar study areas in Colorado. I live in Antonito and not too far from the study just south of Antonito. This location is ideal for the purpose intended and solar energy is vital to the future of our country. I hope that the government will help those of us in small rural towns to obtain affordable means of using alternative energy sources such as solar and wind power. I also think that wind power study areas should be established; and, the locations chosen for the solar study are also viable for wind power study.
