A two year moratorium is entirely to long. one year max should be all that is instituted, if at all. I feel that each study should be done on a case by case basis. If you wait two years more harm will be done by putting more C02 into the atmosphere than if you approved the Solar plans immediately. Don't you see this? Solar energy is clean and renewable. BLM should be promoting the use of Solar on its land and not restricting with the senseless moratorium. It's just another thing that has the conspiracy theorist thinking that s big energy is blocking progress when in actuality its the BLM.blocking
