If you believe the BLM belongs to the people, then the most land any company or person should be able to secure is about 1/10 an acre assuming everyone is given equal access and 30 million acres dedicated to solar. Why is the BLM offering larger tracts?

Basically what you are saying only somebody with money and power can use the public lands, public bases, ANWR, ... If so why not just deed off Yellowstone to Warren Buffett.

However what is valuable are the solar rights.

Why should some guy living in Maine be forced to install PV with 2 sun-hrs a day. When they could install pv on their land in California with 7 hrs-day sun. When basically the utilities, and their \$million dollar CEOs, are doing the same thing with your land. While they charge you market rates.

Furthermore these plants are thermal plants wasting precious water.

If I had it my way any BLM official that approves of these would be leaving the agency and possible criminal actions taken. Basically it is stealing land and giving it to a minority. Just because someones emails support in, it is no excuse for theft. I am sure many people email the governor requesting to be pardoned too.
