To Whom It May Concern:

I live in California and I am a desert racer. As you know many of us have to travel out to the Las Vegas area to race. By shutting down this land you are not only shutting thousands of ohv acres but you are shutting down a large portion of a track that more than five organizations use a year. There already have been many land closures in the area in which these panels could be placed. For example in the Laughlin area our track there is growing shorter and shorter each year due to land closures. It is my best interest to do what is right for the earth but I do not believe that shutting down the acres of land is necessary.
