Closing our desert to give access to a business to make money is wrong. I hope that the area will be compensated , If a private company can shut down our desert, then the government should make up the difference. with equal or greater area. We use such a small area and they want that too. The access is the problem we can access it so can they . We develop roads so they use them to find places to close. We will use the desert one way or another. Lets try to do it with reasonable thought for everyone .
Thanks Dan Higginbotham.
